

# Mask Bot

A chrome extension to recognise alert for mask removals

Face Masks are our primary shields to protect us from Covid 19

Imagine having a light weight Chrome Extension which can do all the following tasks :

## Large scale usage :

- Any public computer usage places such as Internet café, an IT company, a School or college labs, offices etc
- Admins can install this extension on all user devices and track activities such as face mask removal or improper usage of face masks
- Alert the user first to wear his face mask while working a computer
- Admins get an instant mail alert if someone removes mask in their office/lab
- Daily reports will generated based on face mask activity, chances of getting a Covid attack etc..

## Personal use :

- Alert the user to wear his face mask while working a computer.

## Tech Used :

- Javascript
- ML in the browser with ml5 and tensorflow
- PHP on the server side to generate reports and mail them accordingly
